(period ending March 14th, 2014)
released March 19th, 2014*

Weekly Nanos Party Power Index

Liberal Index Score Highest, Tories Second, NDP Score Slides – BQ Accessible Vote Drops with Quebec Election Call (Released 03/19/2014)

Although the Liberal score in the Nanos Party Power Index is higher than the other parties (58 points on a 100 point scale), the Tories are starting to widen their advantage over the NDP for the first time since November 2013. The Conservatives registered 51 points out of 100, the New Democrats 48 points and the Green Party 32 points. The current index score for the NDP is the lowest since the first week of November 2013. The erosion for the NDP over the past week has been largely fueled by NDP index score declines in British Columbia and Atlantic Canada.

Trudeau remains the top preference for Prime Minister at 32 percent, followed by Harper at 27 percent, Mulcair at 17 percent, and May at 6 percent.

Of note, in the Province of Quebec, the proportion of Quebecers that would consider voting for the BQ has declined from 35 percent to 24 percent. This has occurred concurrently with the speculation and call of the provincial election in Quebec.

About the Index

Weekly Nanos Party Power Index

Since voters are not actually able to make a choice between elections, it is interesting to think about party strength and support more broadly. The Nanos Party Power Index fills this need by incorporating more information than just current vote preference.

The Nanos Party Power Index is a weekly composite measurement of federal party brands based on four questions about the federal parties and their leadership. The questions include:

- a ballot question that captures the 1st and 2nd vote preferences;
- a measure of whether the respondent would consider voting for the party;
- the 1st and 2nd preferences for Prime Minister of the current federal leaders; and,
- whether the respondent believes each current leader has the quality to be a good leader.

The views of 1,000 respondents are compiled into a diffusion brand index for each party that goes from 0 to 100, where 0 means that the party has no brand strength and 100 means it has maximum brand strength. A score above 50 is an indication of brand strength for the party and its leader at this time.

The important factors in this weekly tracking include the direction of the brand strength or weakness and also the brand strength of one federal party relative to another.

Party Power Index

The Nanos Party Power Index Tracking for Canada is based on a composite of the following public opinion measures: the national ballot, which party individuals would consider voting for, the top two choices for Prime Minister, and whether each party leader has good leadership qualities.

Methodology

Survey Methodology

Download our app to get the latest Nanos Numbers streamed to your iPhone.

The Weekly Nanos Party Power Index Tracking is produced by the Nanos Research Corporation, headquartered in Canada, which operates in Canada and the United States. The data is based on random telephone interviews with 1,000 Canadians (land- and cell-lines), using a four week rolling average of 250 respondents each week, 18 years of age and over. The random sample of 1,000 respondents may be weighted by age and gender using the latest census information for Canada. The interviews are compiled into a four week rolling average of 1,000 interviews, where each week the oldest group of 250 interviews is dropped and a new group of 250 interviews is added. The views of 1,000 respondents are compiled into a diffusion brand index for each party that goes from 0 to 100, where 0 means that the party has no brand strength and 100 means it has maximum brand strength. A score above 50 is an indication of brand strength for the party and its leader at this time.

The current report is based on a four week rolling average of Canadian opinion ending March 14th, 2014.

A random telephone survey of 1,000 Canadians is accurate 3.1 percentage points, plus or minus, 19 times out of 20.

About Nanos

Nanos is one of North America's most trusted research and strategy organizations. Our team of professionals is regularly called upon by senior executives to deliver superior intelligence and market advantage whether it be helping to chart a path forward, managing a reputation or brand risk or understanding the trends that drive success. Services range from traditional telephone surveys, through to elite in-depth interviews, online research and focus groups. Nanos clients range from Fortune 500 companies through to leading advocacy groups interested in understanding and shaping the public landscape. Whether it is understanding your brand or reputation, customer needs and satisfaction, engaging employees or testing new ads or products, Nanos provides insight you can trust.
